AOTRAUMA ADVANCED SYMPOSIUM

April 17 & 18, 2018
Moorivier, Dalfsen, The Netherlands

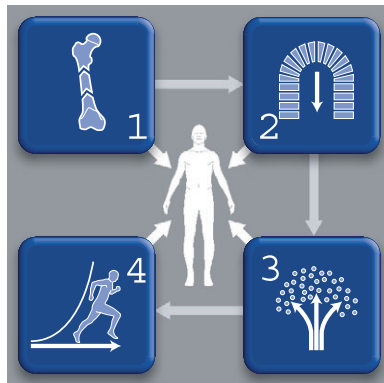

Value statement

AOTrauma is committed to improve patient care outcomes through the highest quality education. We strive to combine the right knowledge and surgical skills that empower the orthopaedic- and trauma- surgeons to put theory into practice and to improve fracture management for the benefit of the patient.

The AO Principles of fracture management

Fracture reduction and fixation to restore anatomical relationships.

Early and safe mobilization and rehabilitation of the injured part and the patient as a whole.

Fracture fixation providing absolute or relative stability, as required by the “personality” of the fracture, the patient and the injury.

Preservation of the blood-supply to soft tissues and bone by gentle reduction techniques and careful handling.

The first AO Course was held in Davos in 1960-these early courses pioneered psychomotor techniques by teaching practical skills of AO Techniques. Since those early days over 250,000 surgeons and 135,000 ORP staff from over 110 countries have attended AO Courses. We now launch AOTrauma to move our education to the next level.
